PROGRAM CHALLENGES & REWARDS

Challenge Rules

Each program presents a challenge that allows you to progress in our ecosystem.

For the INTRO program, a new team initially contains a Chief and two Seniors. Upon your entry, you are inserted into a Junior position, and together, your team's challenge is to fill the four Junior positions.

Once the challenge is completed, the Chief receives a reward and the others are promoted and moved to two new teams.

For all other programs, an identical formula is used but the challenge is greater, with three Senior and nine Junior positions to fill.

Note: It is posible that your entry completes a team, in which case, the team is completed and you are imediatally promoted.

When you earn a free upgrade, you are admitted into a team for the next program, as well as ALL previous programs.

The PAX is an internal currency (Token) that allows certain automated functions within our ecosystem (using smart contracts). Each PAX is worth 1 USD.

You can buy a PACK or get an upgrade to be inserted in a new program. All programs are tied to a PAX reward pool distribution.

When you are inserted into a new team, the system first searches for a team where your referrer is present.
