

What is ALLIANCE360.club?

This is a new social network whose mission is to promote peace in the world and to help the most deprived, particularly in Africa.

How does ALLIANCE360 work?

It is a program based on the circular economy. It finances existing real projects and with the profits made by these projects, it remunerates its members. This program is unique in its kind and it allows any person or all organizations such as NGOs, associations or others to make progressive income depending on the time you devote to it.

The types of projects are:

1. Selling knitwear and caps to promote world peace. Sellers in each country make revenue from the sale of these products and the profits from these sales return to the ALLIANCE for further funding and to share its revenue with investing members.
2. Agricultural projects that exist in Cameroon and Burkina Faso. The ALLIANCE invests in these projects and the profits made are returned to the ALLIANCE to be shared by the investing members.
3. The sale of products shipped to African countries by containers such as clothing, computers, etc. The income generated goes entirely to ALLIANCE which returns it to investors in proportion to their amounts invested.

Project revenue management

All revenue generated by projects is deposited each day into a fund called project profits. These funds are redistributed to investors according to the number of their acquired shares (NFT).

Who runs the social network?

It's about its members. ALLIANCE is a private club. To join, you must have been invited by an already registered member.

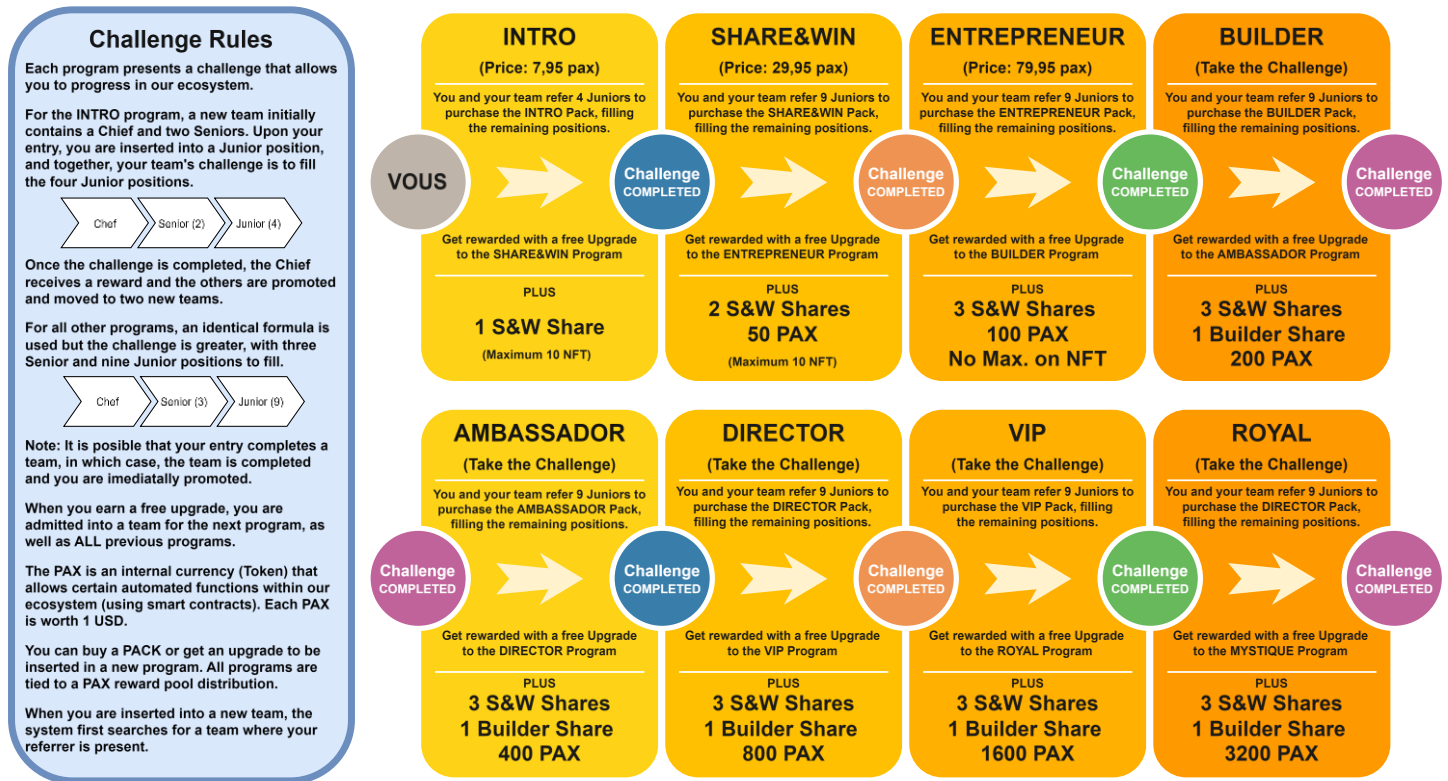

This social network works like Facebook.

There are several ways to participate in this social network:

- By registering for free to make a little money by sharing network content but above all by asking your friends to become members. In each country, when we have reached at least 250 members in that country, we will launch a merchant promotional program (see program below). The more members you bring in, the more you get paid. The funds you receive will allow you to enter the system to cross positions such as:
- Depending on your progress since your entry or by paying 7.95 USD which equals 1 share you are called Intro
- Depending on your progress from your position at 7.95 or by paying 29.95 USD which equals 2 shares You are called Share and win
- Depending on your progress from your position at 29.95 or by paying 79.95 USD which equals 3 shares you are called entrepreneur.

You can become a leader in your country starting from 0.

PROGRAM CHALLENGES & REWARDS

Acquisition of shares (NFT)

A social share or NFT is equal to 10 USD

When you have the Intro position you can buy 10 social shares (NFT) maximum

When you have the Share and Win position, you can buy up to 30 shares (NFT).

When you have the entrepreneur position, you can buy as many shares as you want (NFT).

How to cross positions starting without having invested anything other than your time.

- As we saw above, by sharing content, it gives you points that turn into cash.
- By bringing in new members (Very important) if this member buys any position, you receive commissions on your business volume.

Distribution of funds purchased by members:

A business volume (VA) is established for all positions:

Amount of VA allocated for each position

- Position at 7.95 USD VA = 2 USD
- Position at 29.95 USD VA = 8 USD
- Position at 79.95 USD VA = 20 USD

This VA is shared as follows:

1. 30% is deposited for the ALLIANCE budget

2. You receive 40% for bringing in this new member - level 1
3. Whoever brought you in receives 20% - level 2 and finally
4. 10% goes to the person who brought this last member into level 3

VAs are paid in PAX which is equivalent to 1 USD each.

With your PAX, you can retrieve them immediately in your Wallet (electronic wallet) or you can buy shares (NFT) or you can buy a position.

The Merchants program

In each country we will launch the merchant program. It is important to understand that to set it up, you must have at least a certain number of members in the country's network; the need is estimated at at least 250 members.

The Merchants program is very profitable for those who want to approach merchants.

The registration cost for the trade is 64.95 USD or approximately 40,000 FCFA which gives a VA of 50 USD

- 30% of the VA goes to the ALLIANCE, i.e. 15 USD or 9,000 FCFA
- 40% of the VA goes to the seller, i.e. 20 USD or 12,000 FCFA is given to the seller
- 20% of the VA goes to the person who brought the seller in, i.e. 10 USD or 6,000 FCFA
- And finally 10% returns to level 3, i.e. 5.00 USD or 3,000 FCFA

For all your transactions, we use a partner who is able to receive payments through MTN or Orange coin type wallets. The same goes for receiving your income in the opposite direction.

If you are interested in becoming a member, ask the person who told you about ALLIANCE360 to provide you with the registration procedure and their registration link.
